

# Penatalaksanaan dan Pemeriksaan Spesimen Coronavirus (COVID-19)

## Pengambilan Sample & Packaging

Virocult

Virus specimen transport for Molecular and Culture Techniques

Nunc 375418

Compliance with IATA air cargo regulation with SAL 10-6 & Free RNA-ase

MBP 3469

For protection, flexibility, and choice in the Lab and made from 100% virgin polypropylene to help maximum clarity for biological work

Bio-Freeze Complete Bio-Bottle

Bio-Freeze Complete / cold transfer sample (-20° c) with IATA standard

## Reagent

Genesig Advanced qPCR Detection Kit for Coronavirus (Strain 2019-nCoV) - RUO

- Rapid detection of nCoV-2019
- Positive copy number standard curve for quantification
- Highly specific detection profile
- High priming efficiency
- Broad dynamic detection range (>6 logs)
- Sensitive to < 100 copies of target
- Accurate controls to confirm findings

genesig® kits are sold for research use only and are not licensed for diagnostic procedures.

## Consumables

ThermoFisher Scientific ART Barrier Tips

RT Barrier tips provide 100% security against aerosol and liquid contamination & dense filter will block itself so no liquids or even aerosol can pass through the barrier

Z-genesigEASY-MR

Genesig magnetic separation racks

RNA AWAY

Eliminates RNase from laboratory surfaces. Ideal for decontaminating apparatus, bench-tops, glassware and plasticware

B151

Biohazard disposal bags
